PROFESSIONAL SUMMARY

Computer Science undergraduate passionate about building AI-powered products that combine strong engineering with user-centric design. Experienced in developing GenAI applications, leading student teams, and solving real-world workflow problems through scalable software. Interested in Product Management, AI, and Full-Stack Engineering with a focus on delivering intuitive user experiences backed by data-driven decision making.

EXPERIENCE

E-Cell, IIIT Bhubaneswar

Head of Design Operations & Growth / Dec 2022 – Apr 2024

- Led cross-functional Design and Technical teams to execute 30+ student engagement campaigns, contributing to a **40% year-over-year increase** in participation.
- Standardized design workflows and introduced reusable design systems, reducing creative asset turnaround time by approximately **35%**.
- Collaborated with multiple stakeholders to organize flagship campus events while improving campaign effectiveness through iterative design improvements.

TECHNICAL PRODUCT PROJECTS

Early Prediction of Obstructive Sleep Apnea

Deep Learning Project

- Developed a hybrid **CNN-BiLSTM-Attention** model using SHHS SpO₂ signals for early sleep apnea prediction.
- Achieved **91.04% accuracy** and **99.58% sensitivity**; built preprocessing pipeline using Python, TensorFlow, Keras, and Scikit-learn.

Atlas AI (Autonomous Travel Operating System)

Next.js, Gemini

- Built a multi-agent AI travel planner that converts natural-language trip requests into personalized itineraries.
- Developed modular AI services, editable itineraries, research workflows, and responsive dashboards using Next.js, TypeScript, and Tailwind CSS.

NorthPole AI

Independent AI Project

- Built an AI-powered product management assistant that converts natural-language product requirements into structured engineering tasks and user stories.
- Automated generation of acceptance criteria, implementation plans, engineering tickets, and feature breakdowns using LLM-based workflows.
- **Tech Stack:** Python, OpenAI API, LangChain, RAG, Vector Database.

INDEPENDENT PRODUCT RESEARCH

Snabbt Quick-Commerce Product Teardown

UX & Growth Analysis

- Evaluated the complete customer journey to identify user friction, retention opportunities, and onboarding improvements.
- Analyzed behavioral nudges, dark patterns, and engagement strategies to understand their impact on user retention.

UPI Incentives & Unit Economics

Product Strategy Analysis

- Studied monetization strategies adopted by Google Pay and PhonePe in India's zero-MDR ecosystem.
- Evaluated the transition from cashback-driven customer acquisition toward sustainable financial services and credit-based revenue models.

SKILLS

Product

Product Strategy, PRDs, Roadmapping, User Story Mapping, A/B Testing, KPI Tracking, RICE Prioritization

Languages

Java, Python, SQL, TypeScript, JavaScript

Frameworks

Next.js, React, TailwindCSS, Node.js

AI/ML

LLM Agents, RAG, Gemini API, OpenAI API, TensorFlow, Keras, Pinecone

Tools

Git, GitHub, Figma, Jira, Linear, Postman, Supabase

EDUCATION

International Institute of Information Technology, Bhubaneswar

2022 – 2026

Bachelor of Technology – Computer Science & Engineering

CERTIFICATIONS & VIRTUAL EXPERIENCE

- **Atlassian Agile Project Management Professional Certificate**
- **Electronic Arts Product Management Virtual Experience** – Completed feature prioritization, roadmap planning, and retention analysis simulations.
